

Sterile, Single Use Microscope Drapes

Full and partial coverage available!

The Full Drape (complete microscope coverage) shown below was designed for surgeons and facilities that require full field sterility.

Item #: 40100

The Head Cover Drape (partial microscope coverage) shown above was designed for surgeons and facilities that only require the lower portion of their operating microscope to be sterile.

Item #: 40101

Either drape may be used with all common ophthalmic operating microscopes and are engineered for use with the SUPER VIEW® or BIOM® Wide Angle Viewing Systems. Installation is simple using the pre-attached velcro and self-adhesive tabs.

Please visit our website at www.insightinstruments.com for draping instructions and installation videos.
